

JAGOAN GTF, IS A HERO COMING FROM GTF

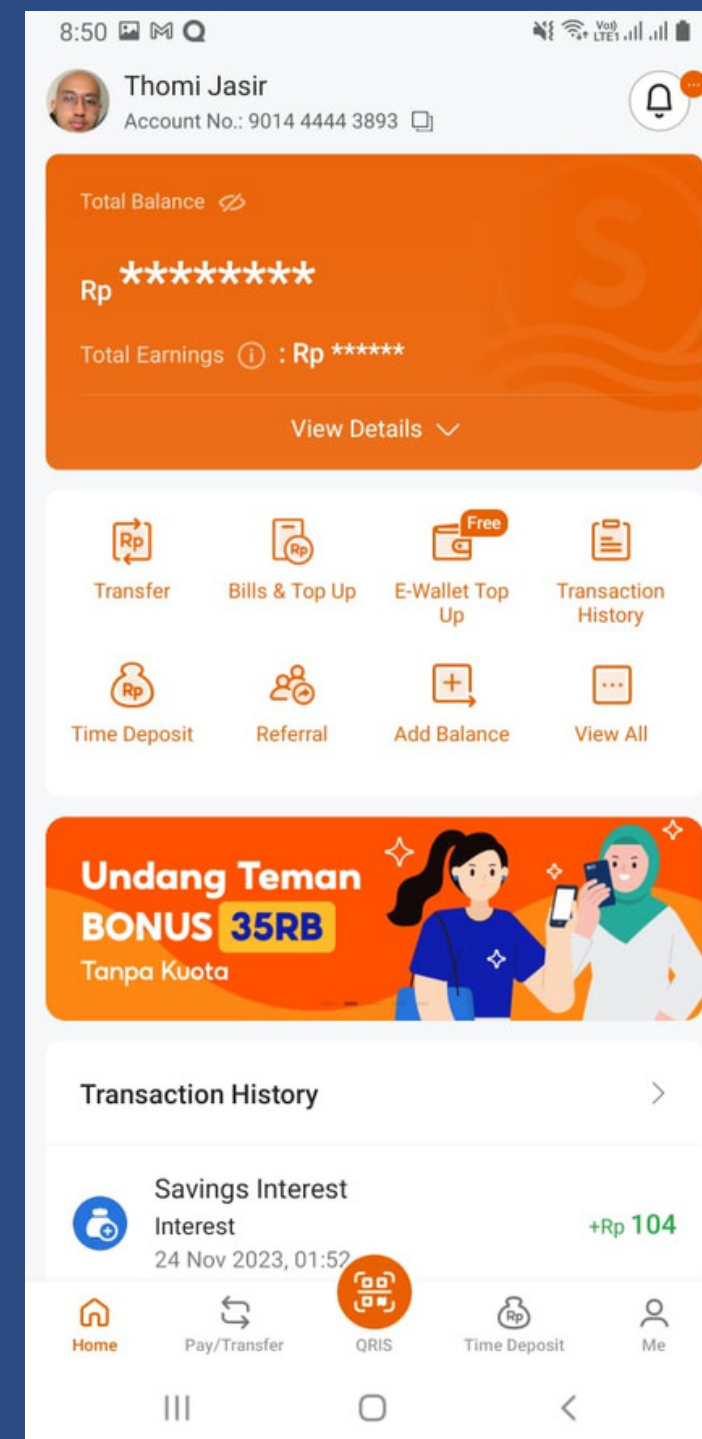

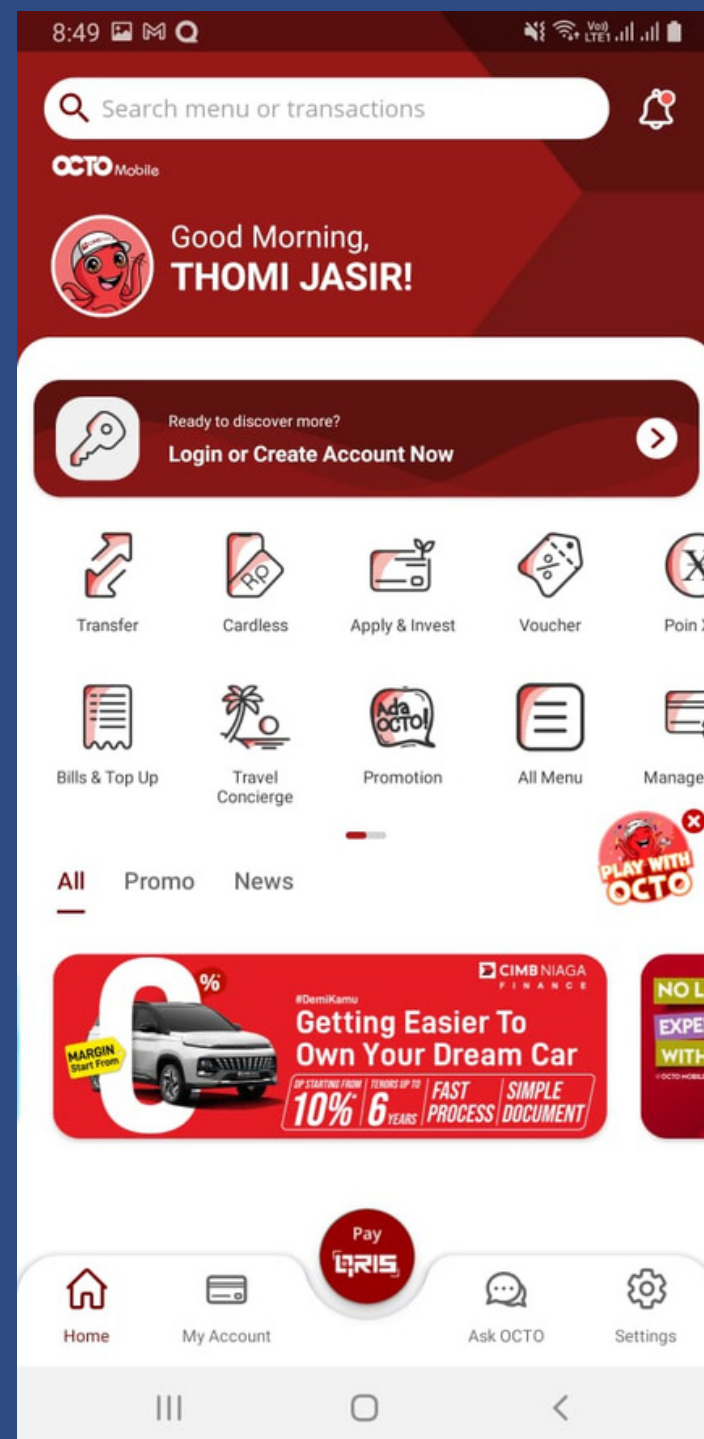

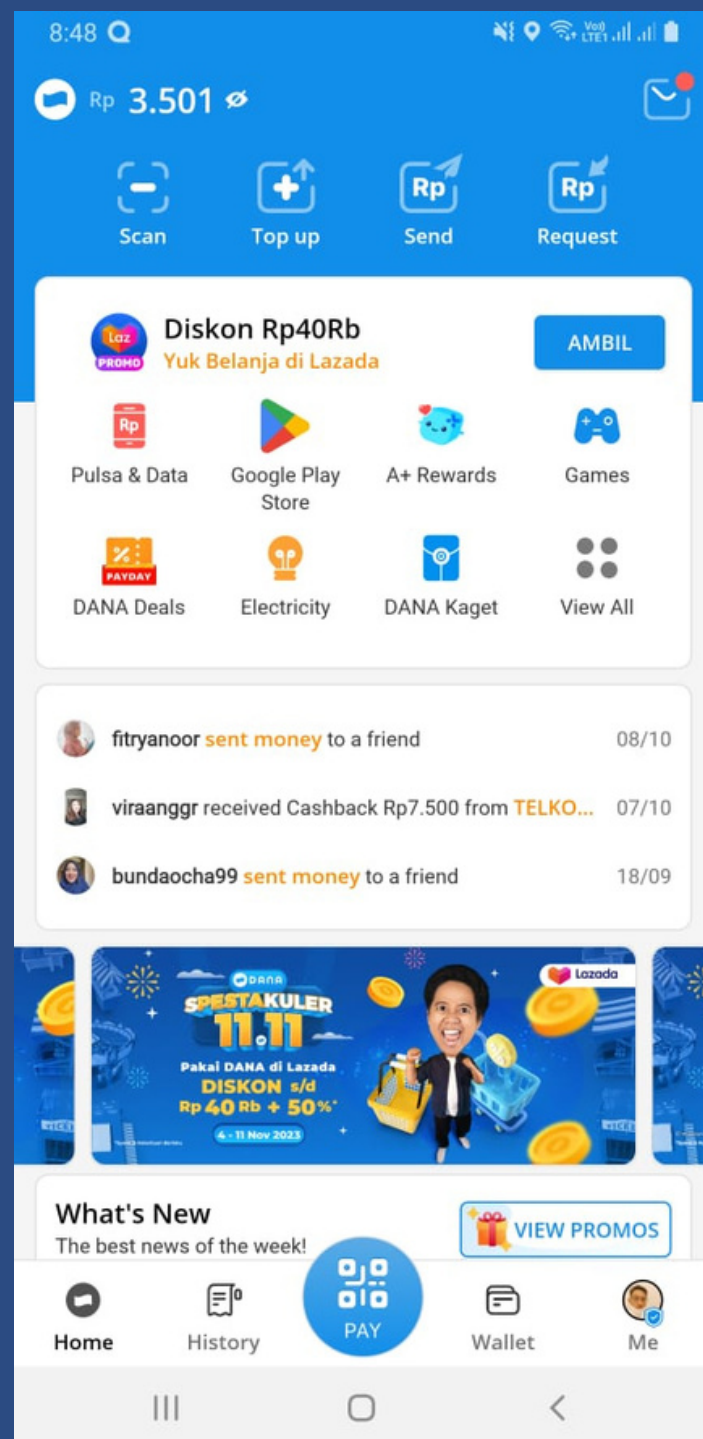

# GOTO Hack 2023

Small Changes Can Make It Better

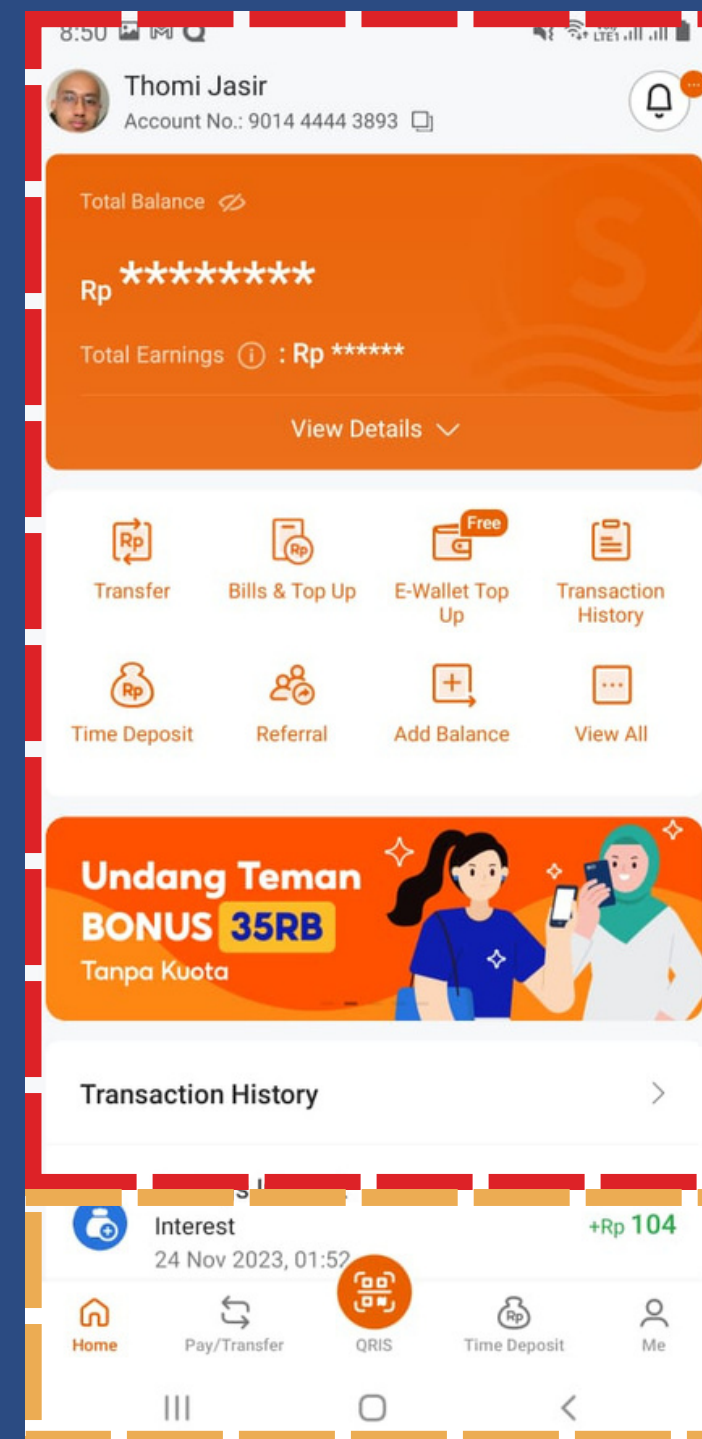

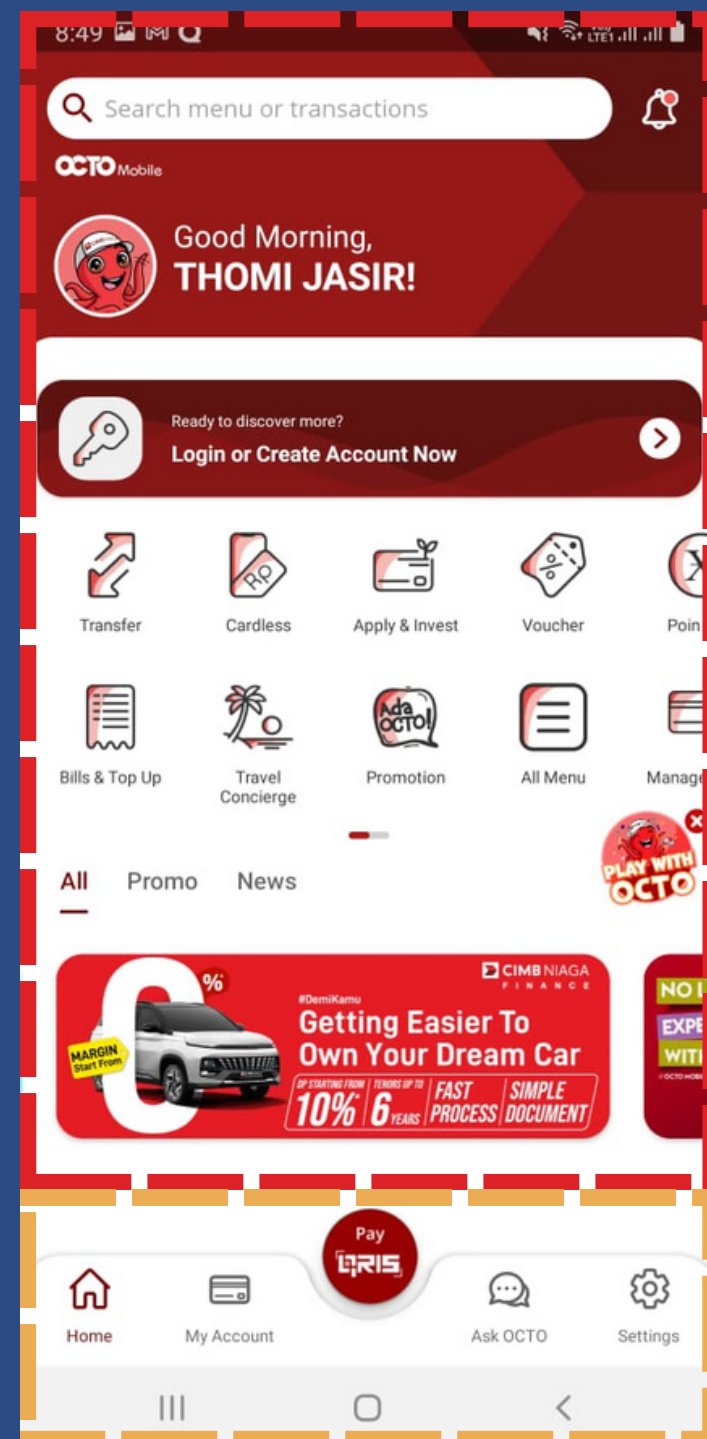

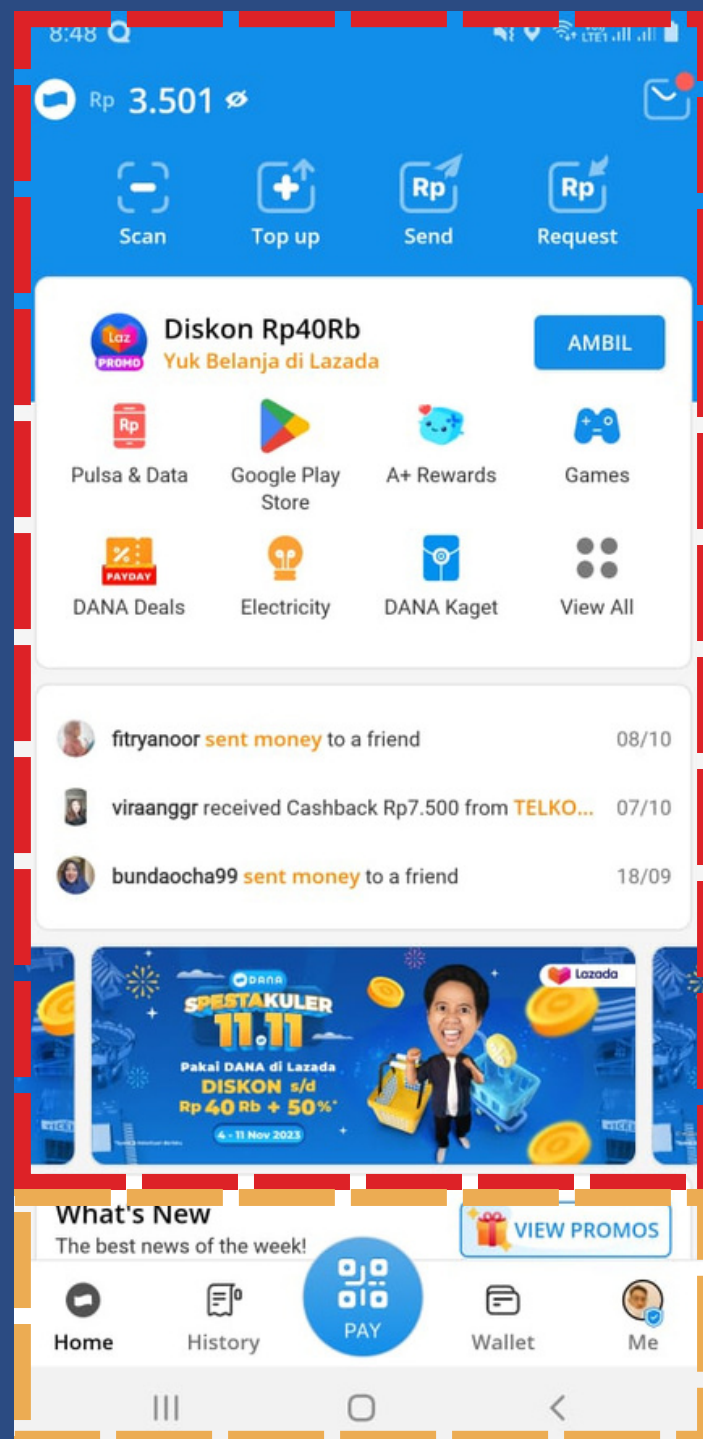

# Are they the same?

if we take a look in 2023 there are more than hundred payment/banking apps in the market right?

# Improve?

SO FROM THAT DESIGN  
PATTERN WE SEE, THERE  
IS SOMETHING THAN WE  
CAN TWEAKS

## Lowering cognitive load

How can we lowering cognitive load? so user can focus with the features that really need, no disturb by other information or too much

---

## Getting process/step done faster

How can we ride of unnecessary step so make sure the user getting done faster

---

## Customize widget based on user preferences

How can we crafted something that signature for user its unique
